TAIYE DRILL

360 DTH

TAIYE-360-DTH Semi-Hydraulic DTH drill

TAIYE-360 DTH drill is an economical drilling rig, which is suitable for drilling holes in hydropower, building materials, metallurgy, large and medium earthwork and open pit mines. When the speed reaches the peak torque at 1500rpm, which will achieve the most economical model.

TAIYE-360-DTH extends the excellent process quality of TAIYE-370-DTH, which is powerful and durable. It is the best choice for you to have less investment and steady return in drilling construction.

Off-road capability

The center of gravity of the whole machine is in a low position, and the climbing ability of the single machine is 35 degrees. A stable output of the walking motor, with brake valves and mechanical brakes, which has high braking sensitivity. The chassis clearance is 435 mm from the ground, facing the rugged site, demonstrates its passing ability.

Sliding frame and Boom

The sliding frame inclines 20 degrees, which is convenient for operators to observe the drilling situation, improves the drilling accuracy.

Control deck

The working height of the whole machine is 1600 mm. The walking valve can swing between 0 and 90 degrees in order to observe the moving state clearly, selecting the operating angle according to the working condition, and prevent the traction accident. A comfortable and layout of the operating platform conforms to ergonomics, which can realize the centralized control of multiple executing structures, the operating valve is sensitive and accurate.

Technical Parameter

Drilling hole	90-152 mm
Working pressure	1.38-2.46 Mpa
Turning torque	1970 N.m
Turning speed	0-100 Rpm
Lifting force	20 KN
Sliding frame swing	Left 53° / Right 35°
Sliding frame pitching	180°
Drilling boom swing	Left right/45°
Drilling boom pitching	Horizontal/25/60°
Grade ability	35°
Manufacturer	Yuchai Diesel etc
Rated power	56 Kw
Dimensions	6900X2186X2300 mm
Weight	6500 kg
